The product complies with standard EN 71 & Directive 2009/48/EC.
Der Artikel erfüllt die Normen EN 71 & Richtlinie 2009/48/EG.
Le produit répond aux normes suivantes EN 71 & Directive 2009/48/CE.
Il prodotto rispetta le norme comunitarie EN 71 e Direttiva 2009/48/CE.
Dit product voldoet aan standaard EN 71 en richtlijn 2009/48/EC.
Este producto cumple con la norma EN 71 y la Directiva 2009/48/CE.
Lekestativet er produsert etter følgendestandard og direktiv: EN 71; 2009/48/EU.
Produktet overholder standarden EN 71 og direktiv 2009/48/EF.
Produkten uppfyller standard EN 71 och direktiv 2009/48/EG.
Tuote on sertifioitu standardin EN 71 & Direktiivi 2009/48/EY mukaan.
Toode vastab standardile EN 71 ja Direktiivile 2009/48/EÜ.
Produkt zgodny z normą bezpieczeństwa EN 71 i wymogami dyrektywy 2009/48/WE.
A termék megfelel az EN 71 szabvány és a 2009/48/EK irányelv követelményeinek.

ENGLISH

WARNINGS:

Not suitable for children under three years of age.

Suitable for children aged 3-14 (max 50 kg/user).

Use only under direct adult supervision – risk of falling and injury.

Meant for outdoor home use only!

Keep away from fire!

ATTENTION:

The product requires assembly. Assembly required by at least two adults!

Climbing the fences and roof of the assembled house is prohibited!

Caution! Wooden parts may have splinters, sharp edges and ends.

Loose items of clothing pose a risk – hoods, cords, etc. can become entangled while playing.

Dear client,

Thank you for choosing our environmentally friendly playhouse!

Before starting the installation, check the product's parts and their quality. The list of parts can be found in the product blueprint. Upon discovering a defective or missing part, the corresponding defect must be immediately photographed (before starting the assembly) and the information must be forwarded to the Seller of the garden house.

Before assembling the garden house, please read this assembly manual thoroughly, as well as the general assembly instructions and warranty conditions, in order to prevent possible problems and extra time spent during installation.

Please keep the assembly and installation instructions for future reference.

Tips:

The playhouse must be installed on a level surface at least 2 m away from any other structure or obstruction such as a garden, garage, house, overhead branches, clotheslines or electrical wires.

When choosing the location of the playhouse, make sure that the house is not in the way of extreme weather conditions (areas with strong wind or snowfall). To ensure safety, the house must be fixed to the surface even if the necessary means for fixing are not included in the playhouse kit (e.g. anchors).

Making changes to the product (e.g. adding additional equipment) can only be done according to the manufacturer's instructions.

Anchoring:

The house must be anchored to the base surface. It is not allowed to use a house that is not anchored! The anchors and method of attachment must be chosen according to the substrate (see the installation manual). NB! Anchors are not included in the set.

A. Soft surface installation

Concrete fork heads must be used when installing the house on a soft surface. One concrete fork head must be taken into account for each post. To install concrete fork heads, holes must be dug at the location of the posts (consult a specialist). A layer of gravel must be placed at the bottom of the hole and concrete poured on top. After that, the concrete fork heads must be placed in the precisely measured places. Make sure that all the concrete fork heads are placed at the same height. When the concrete has hardened, attach the posts to the concrete fork heads and fix with bolts. The bolt heads must be covered with bolt covers (please note: not included in the set).

B. Hard surface installation

When installing the house on a hard surface, you must use post legs. One post leg must be taken into account for each post. Post legs must not be attached to pavement slabs with fastening bolts if the pavement slabs are not cast in concrete! Fix the post legs exactly in the measured places. Make sure all the post legs are fixed at the same height. Attach the posts to the post legs and fix with bolts. The bolt heads must be covered with bolt covers (please note: not included in the set).

NB! If you are installing the house on a hard surface, the surface under the house must be filled with, for example, mulch or other soft material to prevent injuries from falling. Special anti-shock mats for playgrounds can also be used to cover the ground.

Maintenance:

The product is delivered unfinished!

To reduce the risk of fire, use paints or an impregnating agent that does not promote the spread of fire. Use water-based paints or impregnation agents! Avoid solvent-based products! You must not cover the product with varnishes or paints that have a laminar flame speed higher than 20 mm/s. Consult a professional regarding wood preservatives and paints for untreated softwood and follow the manufacturer's instructions!

The constructions and fastenings of the children's playhouse, swing and slide must be checked regularly and maintained if necessary. If these actions are not taken, the product may fall over or become dangerous.

- Check the fastening of all nuts and bolts and tighten them if necessary;
- Oil moving metal parts;
- Check the covers of all bolts and sharp edges and replace them if necessary;
- Check swing seats, chains, ropes and other fastening devices for possible wear;
- Replace defective parts according to the manufacturer's instructions.

All accessories (slide, swings, etc.) must be removed for the winter period and stored in a room with an even temperature. It is not safe to play on frozen ground. Swing accessories must be protected from the sun. Continuous sun exposure damages the product and is too hot for children to use. In sunny weather, the surface temperature must be checked before use.
